

GNOMON A SCHOOL OF VFX & ANIMATION FOR FILM AND GAMES

CASE STUDY

GNOMON

Being a school that teaches students how to maximize technology, Gnomon decided to digitize their administrative process as well. By using Radix, since early in 2015, they've been able make the record-keeping process much easier by storing all student records together from admissions to graduation.

- **Increased** efficiency by finding records up to 120 times faster
- **Controls** over 2,000 student records and can view them instantly
- **Saves** over \$100,000 every year in labor costs
- **Implementation** and training took less than 6 hours for all faculty

Misty Winters
Education Operations Manager

"Radix has significantly improved how our school operates as a whole. The E-forms are customizable and ensures that we receive the information we need. The workflows streamline our processes and save a lot of time. Organization is key for our school, and with Radix and its many capabilities, our productivity has increased considerably."
